

Custom Driver Protection Systems (DPS)

INFORMATION SHEET

nfi.parts™

MCI

NEW FLYER

TRANSIT APPLICATION

AROWGuard Custom Solution Available for all bus and coach models.

Application: Assault and Virus Protection
Fit: The Custom DPS is designed to each customer's specific configuration requirements
Cost: Dependent on style, design, and order volume

DPS is compliant with
American National Standard
for Safety Glazing Materials
(ANSI) /SAE Z26.1- 1996
standards.

FEATURES

- Fixed door slide system that incorporates a sliding two-piece glass system.
- Allows drivers to select a glass position in the same manner as a driver's window.
- Easy to close and protect the driver.
- Utilizes a time-tested and robust rocker latch.
- Incorporates a hinge design, free of pinch points and rattling.
- Standard and Extended sash options.
- Uses AS2 Glass with OptiView anti-glare coating
- Long-term solution providing both health and safety benefits.

Configuration Possibilities

DESIGNED TO FIT NEW FLYER, MCI, NABI, GILLIG, NOVA, ADL, AND OTHERS

Benefits of NFI Parts Support on Retrofit Projects

- Experts in design
- Ease of design process
- Experience in custom design
- Onsite support
- Full life-cycle product support

Antimicrobial Filter

INFORMATION SHEET

nfi.parts™

MCI

NEW FLYER

**OE Approved
airflow filter
with over 99.95%
effectiveness in
eliminating viruses
and bacteria**

Patented-protected PuraWard® Antimicrobial Fiber Layer (PWF) - Kills 99.95% viruses by using a copper and silver ion property

How It Works

Copper ions weaken the amino acids of the cell wall allowing silver to invade the cell. The Copper and silver then react with key enzymes to cause sterilization, suffocation and starvation of the pathogen.

FEATURES

- Flow-rate tested and approved for MCI brand coach applications - will not harm fan motor
- No modifications needed - no need for filter frame reconstruction, can be cut and installed in existing filter assemblies
- UL 900, and ASHRAE Compliance
- Manufacture recommends a 3 month replacement schedule
- Typical coach uses ~10ft of material
- No shelf life for the anti-microbial coating – does not degrade over time

NFI Part No.	Description
6482974	FILTER-MERV8, W/PWF FIBERS, 90 FT ROLL (24" WIDE X .05" THICK)

Proactive Air and Surface Purification System

INFORMATION SHEET

nfi.parts™

MCI

NEW FLYER

Deactivates SARS-CoV-2 virus by sanitizing the AIR AND SURFACE without leaving any harmful residues!

Results from a study done by the University of Florida using the SARS-CoV-2 virus (which causes COVID-19) show after continuous exposure to this technology the virus becomes inactive.

Fully contained unit replicates nature's eco-friendly purification process indoors by converting Air & Humidity into High Energy Clusters (HEC) and Advanced Bi-Polar Ion Oxidizers. Air is passed across proprietary UVX light and 6 metal honeycomb matrix, which is amplified by enhanced specular reflection, delivering unmatched pathogen elimination in the air and on surfaces.

Continuous disinfection from this unit promotes ridership confidence No down time or additional cleaning during service

FEATURES

- Effective on viruses, bacteria, mold, fungus, VOCs, mildew & odors
- Easy to install and maintain, can be placed in various locations on the vehicle - uses 12V DC power
- Buy America Compliant
- Easy filter replacement every three months, cell replacement once every year
- Does not void supplier warranty of HVAC systems
- One Year Warranty

Proactive Air and Surface Purification System

INFORMATION SHEET

nfi.parts™

MCI

NEW FLYER

Is it Safe?

System is certified as safe to use in occupied spaces, validated by leading independent laboratories and health organizations globally.

Extensively tested and qualified under the rigorous standards of CDC, OSHA, FDA, and the EPA. In fact, successful testing at the University of Florida shows its technology deactivates SARS-CoV-2, the virus that causes COVID-19, as well as deactivating coronavirus 229E.

How it Works

Air + Humidity ⇌ HEC + Oxidizers

This active technology creates High Energy Clusters (HEC) and Advanced Bi-Polar Ion Oxidizers that destroy dangerous pathogens at the cellular level in the air we breathe and on the surfaces we touch. This unit works on its own while the vehicle is in use. Does not require additional downtime or disinfecting labor during service.

Air and Surface!

The system continuously purifies Air AND Surfaces.

Air flows in to the unit creating HEC and Oxidizers that leave the system and attack pathogens in the air and on surfaces.

*Laboratory, testing, validations, and claims have been made by manufacturer. Documentations can be supplied upon request.
Information on this sheet is subject to change at the discretion of NFI Parts and/or its affiliates. Contact your NFI Parts solutions manager or customer service representative for further details.

Proactive Air and Surface Purification System

INFORMATION SHEET

nfi.parts™

The Details:

- Disinfects without down time or additional cleaning during service; once it has been installed and the vehicle is running, it continuously disinfects while the vehicle is on the road
- Continuously disinfects air AND surfaces including hard to reach places while the vehicle is in service
- Effective on viruses, bacteria, mold, fungus, VOCs, mildew & odors
- Proven effective against SARS-CoV-2 (which causes COVID-19) & Coronavirus 229E by University of Florida, Department of Medicine
- Coverage range is up to 30,000 cubic feet (60' transit bus is approx. ~4,000ft³)
- Extensively tested using the standards of FDA, CDC, EPA, OSHA, KSU, UoF, NSF
- Safe to run with passengers onboard the vehicle
- Unit is visible to riders, building confidence regarding their safety
- Does not leave harmful residue
- Easy to install and maintain, can be placed in various locations on the vehicle
- Technology is contained within unit
- Does not void supplier warranty of HVAC systems
- Does not impact other vehicle systems
- Buy America Compliant
- Easy filter replacement every three months, cell replacement every 12-18 months depending on your fleet's actual operational duty cycle
- One Year Warranty

The Research: The Most Validated Purifier on the Market

Researchers at the University of Florida, Department of Medicine found that the proactive air and surface purification technology inactivates 73.33% of infectious high levels of SARS-CoV-2 on stainless steel surfaces within only 15 minutes of exposure to the technology, 93.3% after 60 minutes, 97.7% after 4 hours, and undetectable with 24 hours of exposure.*

Results from the University of Florida study are consistent with those of an independent study done by Central Michigan University and Insight Research Institute which tested the effectiveness of the technology using cell cultures of coronavirus 229E and dengue, both used as surrogate viruses for SARS-CoV-2. This study concluded that there were morphological changes that had realigned the monolayer of A549 cells, seen in coronavirus 229E after exposure to this technology.

It is unique from other disinfection technologies (chemical cleaning, UV light, vaporized hydrogen peroxide) because it is used continuously. There are no downtime periods, chemical handling procedures, harmful residues, room clearance protocols, manpower requirements or adverse side effects. Using ambient air, the technology creates non thermal plasma that reduces pathogens safely while people are in the vehicle. It is the most validated purifier on the market. In addition to SARS-CoV-2, this technology has also been shown to be effective against many other pathogens including H1N1, E. coli, MRSA, Listeria, c difficile, staph, etc.

*Laboratory, testing, validations, and claims have been made by manufacturer. Documentations can be supplied upon request.

Power Vented Safety Roof Hatch Kit

INFORMATION SHEET

nfi.parts™

MCI

NEW FLYER

Add ventilation and improve passenger comfort.

The power safety vent is a combination emergency exit and roof ventilator that utilizes the built in electric fan for extracting condensation, stale or hot air from inside the vehicle to improve passenger safety.

Straightforward Installation

Simply remove your existing roof hatch lid from your existing bezel and install the new power lids

Run Power and Switch Circuit

Install Switch

Allows fresh air to circulate

FEATURES

- Constructed of high strength UV stable materials
- Universal fit application - fits most transit buses and motor coaches (MCI VIN 65000+) with an existing 24" x 24" manual roof hatch (not compatible with the motorized roof hatches)
- Creates a powerful airflow and cross breeze with a durable low profile fan
- Available in white (typical transit applications) or gray (typical motor coach applications) interior color

NFI Part No.	Description
6482386	POWERED ROOF HATCH KIT (INCLUDES TWO POWER LIDS, HARNESSSES, DASH SWITCH AND INSTRUCTIONS) - GREY

Celeste® Sanitizer Products - Sani-Cide EX3

INFORMATION SHEET

nfi.parts™

MCI

NEW FLYER

An EPA registered broad-spectrum disinfectant and multi-purpose cleaner. It offers a safe and effective approach to the disinfection of a variety of surfaces throughout the vehicle while cleaning multi-soils leaving behind a clean, streak and haze free surface.

FEATURES

- Biodegradable
- Non-toxic and non-corrosive
- No quaternary ammonium compounds
- Water based, contains no volatile organic compounds (VOCs)
- Does not contribute to an accumulated grimy/dulled appearance
- Highly effective performance—shows substantial soil removal and minimal soil re-deposition—contains agents that prevent soil re-deposition and make subsequent cleaning easier
- Safe for use on glass, mirrors, metal, plastic, leather, fabric, and carpet
- Non-reactive to and fully compatible with all known fire retardant thermoplastics
